!! WEBINAR !!

Cutting Edge GNSS Tools & Resources Finally Available for Research & Education

December 14th, 2021 - 12:00 PM EST, Duration: 1 Hour

On this **#GivingTuesday** Orolia is honored to share our commitment to students and researchers on a global scale with the launch & expansion of the Orolia Academic Partnership Program!

Click below to read the press release: <https://hubs.li/Q0100hGK0>

Global collaboration and resource sharing have never been easier. Now, professors, researchers and engineers can easily work with innovative test & simulation systems and effortlessly share information that will quickly advance research.

We're proud to play a part in educating the professionals of tomorrow.

The Orolia Academic Partnership Program (OAPP) provides the most robust GPS/GNSS Testing and Simulation tool for research and education with open-source capabilities and a supporting global learning community. With over 30 universities worldwide already enrolled, membership is open to all academic programs focused on GPS and GNSS-based research.

Register for our webinar to learn more & join our programm: <https://hubs.li/Q0100cpw0>

In this webinar, we invite our customers and partner universities to learn about the program, some of the research already being done and what benefits it will bring to our customers and the future of the GNSS Simulation.
