Precision Industrial Amplifiers 

EMC TESTING TO DO-160

Practical Insights for Sections 16, 18 & 19

Termin: 01. Okt. 2025 oder 01. Okt. 2025 - Dauer: 1 Std.

Presenter:

Patrick Andre

Aerospace EMC Consultig
Specialist

What you will Learn:

- Best practices for Power Input (Section 16) testing
- Methods to address Induced Signal Susceptibility (Section 18) challenges
- Insights on RF Susceptibility (Section 19) test setups
- Real-world lessons from aerospace compliance programs

Why attend?

- Reduce compliance-related delays and re-test costs
- Stay current with DO-160 test standards
- Get your questions answered by a DO-160 Standards Committee member

Why should attend?

The session is designed for:

Aerospace and defense engineers

EV compliance and test engineers

Program managers responsible for certification

Compliance professionals looking to reduce costs and delays

*Don't miss this chance to gain insider insights on DO-160 EMC Testing.
Seats are limited - Register now to secure your spot!*

About the Speaker:

Patrick André is a recognized authority in EMC and avionics testing, with over 25 years of experience helping organizations achieve compliance with DO-160 and other international standards.

Die EMCO Elektronik GmbH ist Ihr lokaler Ansprechpartner in Deutschland für die Produkte der Firma VIAVI. Gerne beantworten wir Ihre Fragen in einem persönlichen Gespräch. Rufen Sie uns an!
